Damage Reporting Tool (DRT)
## for SRM-compliant Reports

WHAT IS IT?

The standalone Damage Reporting Tool (DRT)™ is extremely powerful and easy to use. It allows engineering teams **to create quick and detailed SRM-compliant damage reports** using inspection results from the dentCHECK inspection tool – all in **less than 5 minutes!** Easily annotate critical distances, coordinate symbols, cross-sections etc. This digital report can be submitted to OEMs as an auditable record.

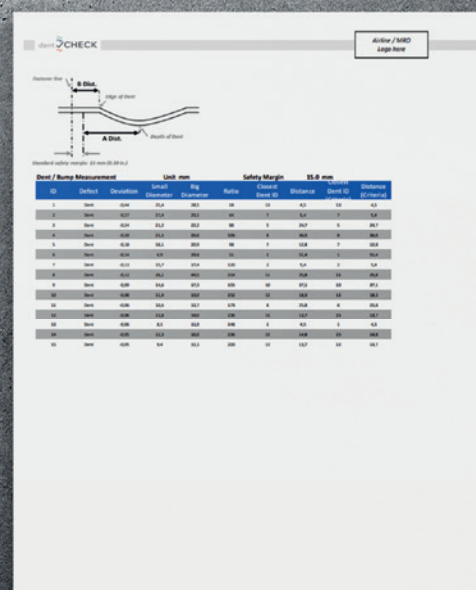

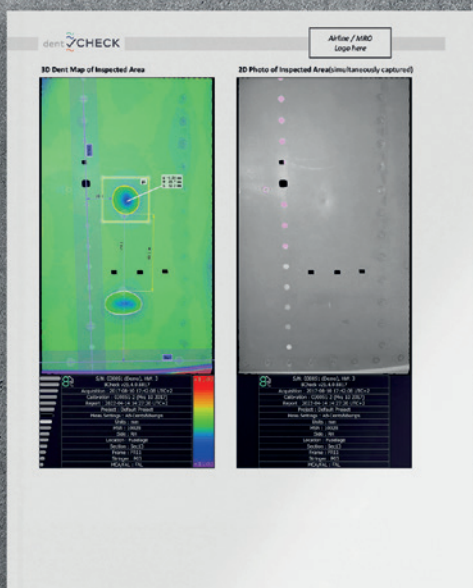

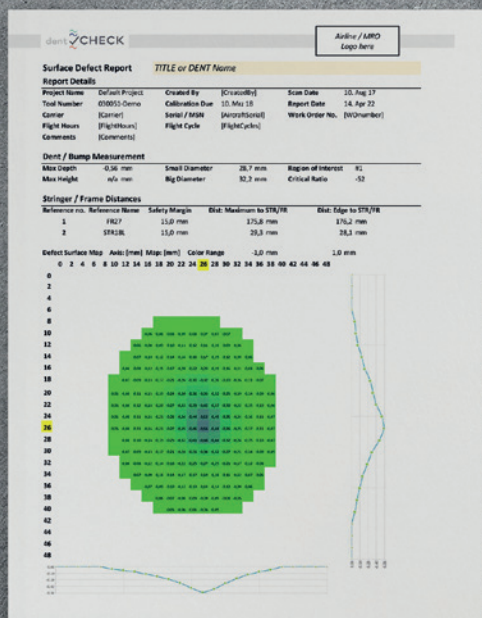

HOW DOES IT HELP ME?

The detailed SRM-compliant damage report contains all information needed to seamlessly integrate into the maintenance workflow, including

✓ SRM mandated critical measurements (depth, dimensions, A/Y)

✓ Color coded result images with numerical annotation

✓ Vertical / horizontal cross-section of each defect

✓ Distance to next stringer / frame

✓ Detailed measurement log (time stamp, operator ID, part ID etc.)

✓ Custom fields to conform to an airline's specific requirements

✓ Switch units between mm and inches

✓ Multi-Dent Reports: 1-Click inter-dent distance, closest neighbors

✓ Blendout Reports, using manual or integrated UTgauge measurements

A Digital Record of all Project Information with Accurate & Automatic Measurements
