

Cloud-based platform for Aircraft Damage Assessment

WHAT IS IT?

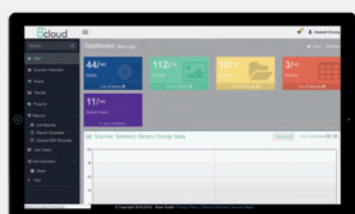

- ✓ Automatic upload of dentCHECK measurements
- ✓ Interface to common Mx Software systems
- ✓ SRM-compliant defect reports – **create, share, store**
- ✓ Asset management & health monitoring of scanner
- ✓ Storage and access of inspection data from 3rd party measurement devices (e.g. UTgauge etc.)

HOW DOES THE REPORTING WORK?

- ✓ Take the aircraft into the cloud – annotate, measure and create reports on real 3D data
- ✓ Impressive reporting capabilities – reference lines with automatic measurements to all detected defects, distances between damages, additional comments
- ✓ Share your results within your team or with external contacts

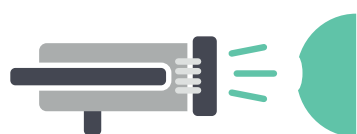

| Reporting capabilities | 8cloud |
|---|---|
| Annotate, measure, create defect report | ✓ |
| Display grid / change units (mm <-> inch) | ✓ |
| Display different result layers | ✓ |
| Dependency on operating system (OS) | none, browser-based |
| Touch enabled (e.g. for tablets) | ✓ |
| Scan repository & sharing capabilities | 8cloud |
| Easy storage and search for scans and results | ✓ |
| Seamless transfer of scans between dentCHECK tool and authorized users in your organization | ✓ |
| Continuously improved without the need for your organization's IT involvement | ✓ |
| Seamless plugin into aviation maintenance software platforms (e.g. AMOS, TRAX, d&b etc.) | ✓ |
| Installation & maintenance responsibility | 8tree (no local installation on customer site, (no involvement of customer IT)) |

WHAT ABOUT SECURITY?

- ✓ Encrypted connections – for all scan data and access to the cloud
- ✓ Redundancy planning – daily backups and different server locations
- ✓ User level access – custom authorization levels within your company
